About EFSF

The European Financial Stability Facility (EFSF) was incorporated in Luxembourg on 7 June 2010. Its objective is to preserve financial stability of Europe’s Economic and Monetary Union by providing financial assistance to euro area Member States in difficulty. In order to fulfil its mission, the EFSF is authorised to issue bonds or other debt instruments on the market to raise funds needed to provide loans to countries in financial difficulties, intervene in the debt primary and secondary markets, act on the basis of a precautionary programme and finance recapitalisations of financial institutions through loans to governments including in non-programme countries. All financial assistance to Member States is linked to appropriate conditionality. EFSF issues are backed by guarantees given by euro area Member States of up to €780 billion. EFSF has a lending capacity of €440 billion.

EFSF is part of the European financial stability package. Its funds are combined with loans of up to €60 billion coming from the European Financial Stabilisation Mechanism (EFSM), i.e. funds raised by the European Commission and guaranteed by the EU budget and up to €250 billion from the International Monetary Fund (IMF). Any financial assistance by EFSF, EFSM and IMF to a country in need is linked to strict policy conditions.
